----------	--------	----------	-------------	---------

SUMMARY: Full Stack Developer skilled in MERN stack and AI/ML applications, currently pursuing B.Tech in Computer Science at Swaminarayan University. Experienced in building scalable web apps, REST APIs, and real-time systems using React, Node.js, MongoDB, FastAPI, and Python. Developed impactful projects including an AI PC Guardian, DSA visualizer, neural network from scratch, and India-wide postal explorer. Active hackathon participant — Top 15% on LeetCode globally.

SKILLS

LANGUAGES:

JavaScript,
Python, C++, Java

FRONTEND:

React.js, Next.js,
Tailwind, Flutter

BACKEND:

Node.js,
Express.js, FastAPI

DATABASES:

MongoDB,
PostgreSQL,
MySQL, Redis

TOOLS:

Git, Docker,
Vercel, VS Code

CONCEPTS:

DSA, OS, DBMS,
System Design,
JWT, REST

EDUCATION

SWAMINARAYAN
UNIVERSITY

2025-
29

B.Tech in Computer Science
Pursuing

NIRMAL SCIENCE
SCHOOL

2024

12th Science, Morbi
78%

NIRMAL VIDHYALAYI

2022

10th Standard, Morbi
92.87%

CERTIFICATES

CORE COURSES:

Python |
Kaggle

Intro to Machine Learning |
Kaggle

Generative AI Mastermind |
Outskill

Introduction to C++ |
SoloLearn

C Intermediate |
SoloLearn

HACKATHON:

Big Code Challenge
2026

Code Clash Elan & nVision |
IIT Hyderabad

K Hacks 3.0 | Anna
University

Odoo x Adani University
Hackathon '26

Doppelganger Build Sprint |
OpenPools

HONORS

■ Solved 220+ DSA problems on
LeetCode; Top 5% globally

■ 6+ working projects with real-
world impact

■ Round 1 Qualifier — Big Code
Challenge 2026

PROJECTS

ALGONEXUS

React · JavaScript · DSA | 2025

Interactive DSA Learning & Visualization Platform

LIVE DEMO

GITHUB

• Built interactive platform with step-by-step algorithm animation for sorting, searching, and graph traversal algorithms.

• Designed fully responsive UI deployed on Vercel; enhanced DSA conceptual understanding and learner engagement.

AUTOSENSE-X

Python · FastAPI · React · Flutter | 2026

AI-Powered PC Guardian — System Monitoring, Optimization & Security

GITHUB

• Full-stack AI system guardian with Python/FastAPI backend, React frontend, and Flutter mobile app for real-time PC monitoring.

• Integrated IsolationForest + LSTM models for failure prediction, AI malware scanning, voice assistant, and offline fallback mode.

• 20+ REST API endpoints — system health, process management, security, JWT + Google OAuth, and AI-generated PDF reports.

NEURALARCHITECT

Python · ML · Neural Networks | 2025

Neural Network Built from Scratch — No External ML Libraries

GITHUB

• Implemented forward/backpropagation, activation functions, and loss optimization entirely in pure Python with no ML libraries.

• Integrated Adam optimizer and dropout regularization to prevent overfitting; deepened understanding of ML internals.

DEPLOYFLOW

DevOps · CI/CD · Docker | 2025

Automated Deployment Pipeline

GITHUB

• Built automated CI/CD pipeline for build, test, and deployment; containerized apps with Docker for consistent environments.

• Reduced deployment time and improved reliability through end-to-end automation across multiple deployment environments.

PINATLAS

MERN · MongoDB Atlas | 2025

All India PIN Code Explorer — 154,000+ Post Offices

GITHUB

• Full-stack MERN app to explore 154,000+ Indian post offices with filtering, search, charts, and CSV export.

• 10 REST API endpoints with MongoDB Atlas indexing; cascading dropdowns, debounced search, and interactive bar/pie charts.

FRONTEND | CLONE & MINI PROJECTS

DSA / VISUALIZERS

MINI GAMES

API PROJECTS

• Sorting Visualizer

• Pathfinding Visualizer

• BST Demo

• Stack & Queue

• Tic-Tac-Toe

• Memory Card

• Color Guess

• Whack a Mole

• Weather Dashboard

• News Feed

• Meals Explorer

• Fake Store

HACKATHONS

✓ Code Clash — Elan & nVision 2026, IIT Hyderabad

✓ Odoo x Adani University Hackathon '26

✓ Big Code Challenge 2026 — Round 1 Qualifier

✓ Doppelganger Build Sprint — OpenPools

✓ K Hacks 3.0 — Anna University
